Words to know

PERFORMANCE CAP

The most growth (or ceiling) you can earn for an indexed term. Cap rates vary based on the index, term option, protection option, and death benefit chosen. Available with 1-year and 6-year terms.

PROTECTION LEVEL

The percentage loss that Lincoln will absorb from a market downturn. If a market index drop is in excess of the protection level, there is the risk of loss of principal. Not all protection levels are available with all term options.

PERFORMANCE TRIGGER RATE

An amount that's credited to your account if the index change is positive or flat at the end of an indexed term. Performance trigger rates vary based on the death benefit and protection option chosen. Only available with the 1-year term.

FLOOR PROTECTION

The maximum percentage of loss clients will experience from a market downturn. If the market index drops in excess of the floor, Lincoln will absorb the additional loss. Only available with the 1-year term.

PARTICIPATION RATE

To determine the growth you earned for an indexed term, the participation rate is multiplied by any positive percentage change in the market index. Participation rates vary based on the index and death benefit chosen. Only available with the 3-year term.

Lincoln Level Advantage is an indexed variable annuity. Annuities are long-term investment products that offer tax-deferred growth, access to a lifetime income stream, and death benefit protection. To decide if Lincoln Level Advantage is right for you, consider that its value will fluctuate; it is subject to investment risk and possible loss of principal; and there are costs associated with the variable investment options such as product charges. All guarantees, including those for optional features, and all amounts invested into the indexed accounts are subject to the claims-paying ability of the issuer. Limitations and conditions apply.

Indexed account options

Account value allocated to an indexed account tracks a market index's performance. You keep any growth, up to a performance cap or based on a performance trigger or participation rate, and you select from protection levels or floor protection to help guard against market losses. **There are no explicit product charges associated with account value allocated to the indexed accounts.**

Important risk disclosures:

Significant differences exist in risk among investment asset classes. Be aware that some investments have principal and yield that will fluctuate, some with extreme volatility. Each investment type has different investment characteristics. Stocks can have fluctuating principal and returns based on changing market conditions. The prices of small company stocks generally are more volatile than those of large company stocks. Bonds have fixed principal value and yield if held to maturity. U.S. Treasury bonds and bills are also guaranteed as to the timely payment of principal and interest. Junk bonds have high credit risks. International bonds and securities have economic, currency, political and social risks. Sector funds have more volatility from being concentrated in a particular group. Past performance is not a guarantee of future results. Neither asset allocation nor diversification can ensure a profit or protect against market loss.

Performance cap, performance trigger, and participation rates are available prior to purchase and renewal. See LFG.com/LevelAdvantage for current rates.

The indices used are price indices and do not reflect dividends paid on the underlying stocks. The level of the index may reflect the deduction of an annual fee. See prospectus for details.

Lincoln Level Advantage[®] indexed variable annuity is a long-term investment product designed for retirement purposes. There are no explicit fees associated with the indexed-linked account options available. There are associated fees with the variable annuity subaccounts, which include a product charge, and administrative fees. Annuities are subject to market risk including loss of principal. Withdrawals are subject to ordinary income tax treatment and, if taken prior to age 59½ in nonqualified contracts, may be subject to an additional 10% federal tax.

Indexed-linked variable annuity products are complex insurance and investment vehicles and are subject to surrender charges for early withdrawals. Please reference the prospectus for information about the levels of protection available and other important product information.

The risk of loss occurs each time you move into a new indexed account after the end of an indexed term. If the negative return is in excess of the protection level selected, there is a risk of loss of principal. On accounts with floors, there is risk of loss of principal down to the floor selected if the index return is negative. Protection levels and floor protection that vary based on the index and term selected are subject to change and may not be available with every option.

Investors are advised to consider the investment objectives, risks, and charges and expenses of the variable annuity and its underlying investment options carefully before investing. The applicable prospectuses for the variable annuity and its underlying investment options contain this and other important information. Please call 888-868-2583 for free prospectuses. Read them carefully before investing or sending money. Products and features are subject to state availability.
