

Lock in market performance

6-year annual lock

Often, investing can feel complex. You may prefer a simple approach to maintaining a balanced portfolio. With *Lincoln Level Advantage*[®] indexed variable annuity, money allocated to an indexed account allows you to keep any growth, up to a performance cap, and have a level of protection to help guard against market losses. You can choose from a range of indexed account options, including the 6-year term detailed here.

Below is a hypothetical example of how a six-year annual lock term works. In this example the indexed interest is determined and locked in each year over a six-year period. The interest is credited to the *Lincoln Level Advantage* account at the end of the six-year term.

Initial investment	\$100,000
Term	6-year annual lock
Level of protection	10%
Performance cap (applies each year)	10%
The <i>Lincoln Level Advantage</i> difference	\$15,482

Example is for illustrative purposes only. The example assumes the hypothetical performance cap for the 6-year annual lock term is 10% and the protection level (the amount of market loss Lincoln will absorb) is 10%. A new cap is declared for each additional term. In the event of market growth, the value will grow up to the cap at a rate based on the market index chosen. If the negative return is in excess of the protection level, there is a risk of loss of principal. Performance cap rates are declared weekly and will vary based on the index, term, protection level, and optional death benefit selected.

Indexed accounts are tied to market performance but are not actual investments in the stock market. You cannot invest directly in an index.

Withdrawals and transfers will adversely impact the value of the indexed segment. See prospectus for details.

Index return	12%	-5%	10%	-12%	12%	11%
LLA return	10%	0%	10%	-2%	10%	10%
