INTRODUCING
WORLDVIEW
LEGION

Unprecedented visibility into our changing planet
Our next-generation constellation WorldView Legion is the next evolution of Maxar’s industry leading WorldView constellation. WorldView Legion is a fleet of high-performance satellites that dramatically expands our ability to revisit the most rapidly changing areas on Earth to better inform critical, time-sensitive decisions.

WorldView Legion Facts
- Launches in 2021
- Will revisit the most rapidly changing areas on Earth more than 15 times per day
- Triples Maxar’s capacity to collect 30 cm imagery
- Triples our overall capacity over high-demand areas
- Highest image quality and geometric accuracy available
- Compatible with global infrastructure and access programs for Maxar customers
CLARITY AND CURRENCY FOR SUPERIOR CONTEXT

WorldView Legion’s frequent revisit rates expand our impact on the mapping and monitoring missions we’ve always supported, and now enable significantly more accurate, comprehensive, and timely pattern-of-life and human geography analysis.

Combining the most advanced geospatial analytics and expertise available with this new wealth of current content will equip customers with unrivaled insights and answers for a competitive

Use Cases:

Increased revisit means more relevant, meaningful insights to fuel:

- Vehicle navigation
- Environmental sustainability
- Global connectivity
- Disaster response
- National security
GROWING THE WORLD’S MOST ADVANCED CONSTELLATION

Maxar’s constellation of high-resolution satellites offers incredible accuracy, agility, and collection capacity, imaging more of the world in the finest level of detail. This constellation is unmatched in the industry, providing the best visibility into global change and enabling innovative organizations to conserve resources, expedite operations, improve compliance, and save lives.

About Maxar:

Maxar is a trusted partner and innovator in Earth Intelligence and Space Infrastructure. We enable commercial businesses and government organizations to monitor, understand and navigate our changing planet; deliver global broadband communications; and explore space. Our unique approach combines decades of deep mission understanding and a proven foundation of commercial technology.
