**Fort Mill, SC** - Caring is a core Domtar value and supporting our customers and community partners to impact lives are embedded in our culture. One of the ways we live out this core value is by supporting [City of Hope](#), a world leader in independent research and treatment centers for cancer, diabetes and other life-threatening diseases through our membership in the [National Business Products Industry Council](#). Every discovery, advancement and breakthrough is powered through generous supporters such as the network of industry groups, foundations and individuals who all share the vision of transforming the future of health.

Greg Strand, Director of Sales, Office Supply, was nominated to serve on the Council, which includes Independent Dealers, Office Supply Retailers and other industry companies. According to Strand, "We all know someone or may have personally felt the impact of cancer or diabetes. City of Hope unites scientists, hospitals and manufacturing to bring treatments and potential cures to people who desperately need it and they have the capabilities to implement faster than many other organizations. Because of their reach, they are able to deploy these treatments to local hospitals in our communities as soon as they are available.

"Also, the National Business Products Industry Council has been supporting City of Hope for nearly 40 years and during that time over \$200 million has been raised for City of Hope. As a leader in our industry and a key partner to our business product customers, it was a natural fit to participate in the transformative work that City of Hope provides to our local communities."

To learn more about Domtar Paper, please visit [paper.domtar.com](http://paper.domtar.com)  
Or find us on Facebook, Instagram, Twitter or LinkedIn.

The Council's impact supports lifesaving cancer treatments, groundbreaking diabetes research and funds innovative clinical trials. City of Hope operates one of the largest, most successful bone marrow transplant programs of its kind in the world. Numerous breakthrough cancer drugs are based on technology pioneered by City of Hope and are saving lives worldwide. Synthetic Human Insulin or Humulin, which is used by more than half the world's diabetics was developed through research by City of Hope These are just a few examples of the difference that City of Hope is making in the lives of people living with serious illnesses.

One of the ways we make an impact is through City of Hope's Domtar Matching Grant program, where Domtar has agreed to match dollar-for-dollar gifts (up to \$100,000) through a direct mail campaign that will be mailed to over 240,000 City of Hope supporters. The impact of these donations will expand access to cancer treatment to as many people as possible and continue the search for new therapies for life-threatening diseases like cancer and diabetes.
