

New ReSound domes fitting guide

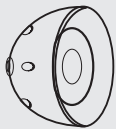

Open dome

Most open fitting dome for less occlusion.

Tulip dome

Allows for more usable gain than the open dome without creating occlusion. A simple choice for demos due to one size option.

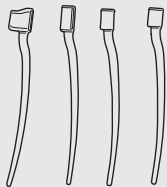

Closed dome

More occluding fit with high level of patient acceptance.

Power dome

For customers who need more power than MP receiver, but would like a smaller option than UP mold

Sport Locks

New, easier to apply, sport lock design geared toward better retention and comfort for people with active ear canals.
