

ReSound Key

Everyone deserves great hearing

Introducing ReSound Key™, our new essential hearing aid family based on our Organic Hearing philosophy and proven technology to emulate how the ear works and the natural way we listen. With a wide variety of hearing aid styles, you can be sure there is a solution for every patient.

RESOUND KEY HIGHLIGHTS

Clear sound and premium audiological features

A complete family of devices in the essentials category

Connectivity with Bluetooth® Low Energy

Direct audio streaming from iOS® and Android™ devices

Easy rechargeability with up to 30 hours of power on one charge

ReSound Assist Remote Fine-Tuning and Live Assistance

A HOLISTIC APPROACH TO GREATER HEARING

ReSound Key leverages Natural Directionality II to support better listening in noise by enabling both ears to work together. It gives patients a focused response in one ear while enabling them to monitor the environment with the other ear. This improves awareness of surroundings and ease of listening without any significant reduction in directional benefit¹.

Patients also benefit from multiple features that use the power of binaural hearing and natural sound quality.

- Sounds up to 116 dB SPL are captured very clearly
- Warp compression maps loudness and frequencies based on the function of the human cochlea
- NoiseTracker II reduces background noise for easier listening
- DFS Ultra II adapts to changing environments to prevent feedback and maintain appropriate gain

1. Compared to bilateral omnidirectional and bilateral directional. Cord et al 2007; Bentler et al 2004

RECHARGEABILITY IS NOW ESSENTIAL

The ReSound Key rechargeable solution* delivers enough power for more than a full day, so your patients can relax and pursue their favorite activities. ReSound Key comes with a convenient and easy-to-use Desktop charger. If the patient needs more, they can upgrade to the portable Premium charger, ideal for traveling and storage.

INTUITIVE AND EFFICIENT FITTINGS

ReSound Smart Fit™ makes fittings easier than ever. Confidently rely on the default feature settings and ensure a better, more comfortable first fit for your patients with Prescribed First Fit and percent gain adjustments. Also benefit from greater flexibility in making fine-tuning adjustments when needed.
