Inserting/Replacing the battery:
1. Open the battery door (F) completely by using your fingertip.
2. Remove protective sticker from battery and wait two minutes before inserting the battery into the hearing aid to allow full activation of the battery.
3. Insert the new battery with the positive side (flat side) in the correct position, as shown.
4. Gently close the battery door. If it doesn’t close easily, check to see if the battery is upside down.

Product: ReSound Key
Model: 61
Serial number (R): _______________________
Serial number (L): _______________________
Battery size: 312

Getting started:
ON: Insert battery & completely close battery door (F). Program 1 will be active.
OFF: Open the battery door (F). Use fingertip to pull it all the way.

Flight mode:
Some airlines prohibit the use of wireless hearing aids (RF transmitters) onboard if required by your airline, enable flight mode:
Disable wireless operation by opening and closing the battery door three times within ten seconds (open-close, open-close, open-close). Your instruments will now be in flight mode.
The hearing aids must function in flight mode for ten seconds before wireless operation can be re-enabled.
To re-enable wireless operation, open and close the battery door one time and wait thirty seconds before opening the battery door again to avoid accidentally entering flight mode again.

Programs:
A. Program button
B. Microphones
C. Receiver
D. Wax guard
E. Dome
F. Battery door
G. Right/Left indicator

What you need to know
Getting started: ON/Off Function
ON: Insert battery & completely close battery door (F). Program 1 will be active.

OFF: Open the battery door (F). Use fingertip to pull it all the way.

Weekly: Clean the receiver tubes and domes (E).
Use a soft cloth to clean the receiver tube and dome on the outside. Do not use water when you are cleaning the receiver tubes.

Regular care & maintenance
Daily: Clean your hearing aid.
Keep your hearing aids dry. Clean the hearing aids using a soft cloth or tissue.

A. Program button
B. Microphones
C. Receiver
D. Wax guard
E. Dome
F. Battery door
G. Right/Left indicator

Tulip domes are mounted in a similar manner to standard domes, but a few extra steps are required. Tulip domes consist of two “petals”. It is important to note that the largest petal is the outermost petal. To ensure this:

1. Push the largest petal away from this:

   ![Image of tulip dome](image)

2. Then push the largest “petal” back, and it will be placed on top of the receiver tube using a finger. This bends the petal forward.

3. Make sure that the new dome is properly and securely mounted.

   ![Image of properly mounted dome](image)

4. Turn on your hearing aid by closing the battery door (F) once.

For changing the white wax guard, complete the following steps:

**Removal:** Insert the removal side of the wax guard tool into the used wax guard so that the hole in the tool is touching the rim of the wax guard. Slowly pull the wax guard straight out.

**Insertion:** To insert the new wax guard, gently press the replacement side of the wax guard tool straight into the hole of the sound outlet until the outer ring lies flush with the outside of the receiver. Pull the tool straight out. The new wax guard will remain in place.

**Wax guard tool**

**Removal side / Replacement side**

**Insertion**

1. Push the new dome over the receiver.

2. Make sure that the new dome is properly and securely mounted.

   ![Image of properly mounted dome](image)

3. Change dome (E)
