What you need to know

Getting started: On/Off function

ON: Insert battery & completely close battery door (B). Program 1 will be active.

OFF: Open the battery door (B). Use fingertip to pull it all the way.

Inserting/Replacing the battery:

- 1. Open the battery door (B) completely by using your fingertip.
- 2. Remove protective sticker from battery and wait two minutes before inserting the battery into the hearing aid to allow full activation of the battery.
- 3.Insert the new battery with the positive side (flat side) in the correct position, as shown.
- 4. Gently close the battery door (B). If it doesn't close easily, check to see if the battery is upside down.

Flight mode:

(if set up by your hearing care professional)

Some airlines prohibit the use of wireless hearing aids (RF transmitters) onboard. If required by your airline, enable flight mode:

Disable wireless operation by opening and closing the battery door three times within ten seconds (open-close, open-close, open-close) Your instruments will now be in flight mode.

The hearing aids must function in flight mode for ten seconds before wireless operation can be re-enabled.

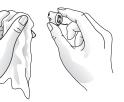

To re-enable wireless operation. open and close the battery door one time and wait thirty seconds before opening the battery door again to avoid accidentally entering flight

mode again.

Regular care & maintenance

Daily: Clean your hearing aid.

Keep your hearing aids dry. Clean the hearing aids using a soft cloth or tissue.

Monthly: Change the wax guard (E) or see your hearing care professional.

For changing the (white) wax guard (E), complete the following steps:

Removal: Insert the removal side of the wax guard tool into the used wax guard (E) so that the shaft of the tool is touching the rim of the wax guard. Slowly pull the wax guard straight out.

Insertion: To insert the new wax guard (E), gently press the replacement side of the wax guard tool straight into the hole of the sound outlet until the outer ring lies flush with the outside of the receiver. Pull the tool straight out. The new wax guard will remain in place.

For changing HF3 wax guard (E), complete the following steps:

1. Brush the sound outlet area with the sound outlet pointed down.

2. Insert the threaded end of the wax guard tool into the used wax guard, (E) and rotate clockwise.

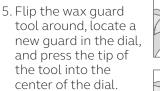

4. Discard

the used

guard in

Beep/tone indicators

BEEP/TONE	INDICATION	ACTION REQUIRED
Ding, ding, ding, dong	Low battery	Change battery
Ding (5 or 10)	Hearing aid is starting up	After dings cease, hearing aid is turned on
