

ReSound Smart Fit 1.18

We continuously strive to improve the fitting experience for you and your patients. Based on your feedback, ReSound Smart Fit™ now supports more accurate fittings and a faster workflow.

What's new?

- Support for all ReSound Nexia styles, including new BTEs and customs
- Support for ReSound Key non-wireless CIC
- New onboarding report
- Consent in App only

What's new	Feature	Benefit	Available For	Image
Onboarding reports - Modernized the report offering for clinicians and patients	Easier access to the Patient Onboarding Reports and a single place for customizations	Reduce navigation time, enabling more time for patient care	All ReSound hearing aids in ReSound Smart Fit	
Onboarding report - Larger font size and different language options	Easier access to view with a larger font or select preferred language when printing report	Improve ease of reading with larger font sizes and ability to change to patient's preferred language.		
Onboarding report - Downloading and emailing report options	Download reports in PDF files for your record or email those reports to your patients	Ability to share digitally to save on printing and save for fitting records		
Consent in App only - Removing Patient Consent menu from Fitting Software	Moving all consent management from Fitting Software to the ReSound Smart 3D app	Simplify workflow/fitting flow and alleviate responsibility of storing and documenting consent.		

If you have any questions about ReSound Smart Fit 1.18 and the new updates, please contact your ReSound sales representative.
