ReSound LiNX 3D™

The future of Smart Hearing is here

A guide for professionals

GN Making Life Sound Better
The future is here – a new dimension in hearing care

In a series that began with the world’s first Made for iPhone® hearing aid, ReSound LiNX 3D™ is the newest Smart Hearing™ aid from ReSound. Because it’s up to 50%† better at identifying speech in various environments*, your patients will hear up to 80%†† more of what’s around them** and understand up to 40%†† more speech in noise** than they hear with competitive premium products while enjoying best-in-class streaming and control with the new ReSound Smart 3D™ app.

What’s more, ReSound LiNX 3D is your entrance to an entirely new dimension in hearing care. Now you can fine-tune settings remotely to address your patients’ real-life challenges – in a way that fits your schedule. All of this is thanks to the new ReSound Smart Fit software and cloud technology.

† Compared to other premium hearing aids.
† † Compared to premium hearing aids with narrow beamforming.

## ReSound LiNX 3D key features

<table>
<thead>
<tr>
<th>FEATURE</th>
<th>ADVANTAGE</th>
<th>BENEFIT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>BINAURAL DIRECTIONALITY™ III</strong></td>
<td>Continuous ear-to-ear exchange of data about the environment optimizes polar patterns and microphone settings in any listening situation.</td>
<td>Your patients can focus on the sounds that are important to them without losing touch with what’s going on around them. Providing the brain with the right information from both ears lets your patients effortlessly follow conversations and shift attention naturally.</td>
</tr>
<tr>
<td><strong>SPATIAL SENSE</strong></td>
<td>Combines algorithms that restore pinna cues and interaural level differences to provide the brain with natural acoustic information for spatial hearing.</td>
<td>Supports your patients’ ability to detect where sounds are coming from, so they experience a more natural sense of their surroundings and the best possible sound quality.</td>
</tr>
<tr>
<td><strong>BINAURAL ENVIRONMENTAL™ OPTIMIZER II</strong></td>
<td>The hearing aids work together to analyze and accurately classify the listening environment, automatically adjusting gain and noise reduction settings.</td>
<td>Your patients can enjoy optimal audibility and listening comfort even when moving through rapidly changing sound environments.</td>
</tr>
<tr>
<td><strong>NOISE TRACKER™ II</strong></td>
<td>A unique spectral subtraction technology reduces unwanted noise without degrading the speech signal.</td>
<td>Improves your patients’ comfort in noisy listening situations without compromising speech understanding.</td>
</tr>
<tr>
<td><strong>DFS ULTRA™ II WITH MUSIC MODE™</strong></td>
<td>High precision feedback path analysis enables DFS Ultra II to cancel feedback with extreme accuracy. Music Mode analyzes the sound over a longer period of time, so the system can better distinguish true feedback from music and other tonal sounds.</td>
<td>Users can now enjoy extra comfort, better audibility and all the subtle nuances of rich sound, even in the most challenging situations. Music Mode provides users with clearer, richer, distortion-free music experience.</td>
</tr>
<tr>
<td><strong>TINNITUS SOUND GENERATOR AND NATURE SOUNDS™</strong></td>
<td>Programmable customized tinnitus therapy sounds as well as Nature Sounds.</td>
<td>Helps users break the ‘vicious cycle’ and achieve some relief from tinnitus by diverting attention through a wide range of soothing background sounds.</td>
</tr>
</tbody>
</table>
ReSound Smart Fit is the newest fitting software from ReSound featuring an intuitive user interface and a new feature called ReSound Assist. ReSound Assist allows you to send remote fine-tuning and hearing aid updates directly to your patients, without an office visit. While the initial fit will always take place in your clinic, ReSound Assist gives you another option to stay in touch and help your patients at your convenience.

You can fit ReSound LiNX 3D with HIMSA’s Noahlink Wireless or an updated Airlink 2.

*GN Insights: Analysis of anonymized appointments (2016)
Stay in control

You manage ReSound Assist in the ReSound Smart Fit software. You can activate it individually for the patients that will benefit most from this service. We make sure you have the data you need to make qualified fine-tuning adjustments – or decide if an in-person office visit is more appropriate.

For every remote fine-tuning request you get:

- A completed diagnostic questionnaire so you can use qualified information to make adjustments
- A record of the hearing aid settings your patient was using when they sent the request
- Datalog of usage information, uploaded weekly into ReSound Smart Fit so you can review how your patients are using their hearing aids

More opportunities

Once you start incorporating ReSound Assist into your professional services, you’ll love the way it keeps you closer to your patients. It will help you solve their recurring listening difficulties, if you for example have patients with:

- A difficult schedule: Instead of a fixed appointment, your patients can send fine-tuning requests anytime
- Mobility issues: Now it’s easier for them to get adjustments without needing to travel to the clinic

To ensure your patients understand what this new benefit can mean for them, it’s a good idea to walk through the ReSound Assist feature in the ReSound Smart 3D app while they’re in the clinic.

Two simple steps and you’re ready to offer remote fine-tuning and remote hearing aid updates:
1. Register your clinic and ReSound Smart Fit users at portal.gnonlineservices.com
2. Give your patients access to ReSound Assist via ReSound Smart Fit
Discreet and reliable
A complete lineup of custom, RIE and BTE styles

SureFit 2 receiver tubes for a perfect fit
ReSound SureFit™ 2 receivers sit more snugly against the head with a softer form that wraps naturally around the pinna. They contour to the shape of the first bend in the ear canal so the tube lies close to the skin and the receiver sits more securely in the ear canal.

Robust and reliable
Since hearing aids need to perform in harsh environments, we make them rugged. In fact, reliability is the second most important attribute when choosing a hearing aid.* All ReSound components – even thin tubes, receivers and domes – are coated with protective iSolate nanotech to repel water, cerumen and debris. Because our intelligent design and iSolate nanotech coating keeps the circuitry safe, all ReSound BTE and RIE hearing aids are classified IP58 to indicate they are water resistant and dust-tight.

Market-leading wireless accessories
You can offer your patients an entire ecosystem of wireless accessories to enhance their hearing in situations with noise, reverberation or over distance. Best of all, they work together as an intelligent system. For example, the TV mutes when a phone call comes in and the TV's sound returns automatically when they hang up the phone, ensuring a seamless listening experience.

*Hearing Tracker: Most important hearing aid feature (2016)

Find out more about all ReSound wireless accessories at resoundpro.com
### Compatibility & Comparison

ReSound Smart Hearing aids can work with:
- An iPhone®, iPad® or iPod touch
- A Phone Clip+
- Any combination of three streaming accessories
- A Remote Control 2

### Phone and app options

### OTHER FUNCTIONS
- ReSound Assist
- Quick buttons - short cuts to sound optimization
- Sound Enhancer - wind, noise, speech adjustment**
- Sound Enhancer - bass/middle/treble adjustment
- Tinnitus Manager adjustments
- Create favorite programs with or without geo-tags
- Program/streamer name customization by user
- Find your lost hearing aid
- Phone operation
- Display

* ReSound Phone Clip+ is needed to use the ReSound Control app
** Available in ReSound LiNX 3D 9

Like you, we place people with hearing loss at the heart of everything we do. Together we can create a world where more people with hearing loss successfully adapt to a life with hearing aids – one that makes them feel more involved, connected and in control. ReSound® empowers people to hear more, do more and be more than they ever thought possible.

ReSound is part of the GN Group – pioneering great sound from world-leading ReSound hearing aids to Jabra office headsets and sports headphones. Founded in 1869, employing over 5,000 people, and listed on NASDAQ OMX Copenhagen, GN makes life sound better.
