Extend your patients’ hearing experience

AN ENTIRE ECOSYSTEM OF WIRELESS CONNECTIVITY
Empower your patients with all the benefits of the ReSound Ecosystem

ReSound products adapt to the way people want to live today. It works so intuitively that your patients will find surprising new ways to use their hearing aids to enrich their lives. With an entire ecosystem of wireless connectivity for streaming sound, on-the-spot fine-tuning and personalization, your patients will hear more, even in noisy places, so they have more confidence to join in.

Whether it’s a phone call, a movie or a quiet conversation in a busy restaurant, every sound is adjusted to each individual’s hearing loss to deliver the most natural, effortless hearing experience possible.

Hearing aids that work like wireless stereo headphones

Our 2.4 GHz technology makes it possible to connect ReSound hearing aids directly to an iPhone®, iPad® or iPod® touch.

This means your patients can stream music, make phone or video calls, listen to podcasts and audiobooks, and even get turn-by-turn directions around an unfamiliar city.

If patients don’t have an iPhone, they can still stream stereo sound for calls and music from their Android smartphone or any other Bluetooth-enabled phone with the ReSound Phone Clip+.

MFI CONNECTIVITY
The simplest and most direct way to make hearing aids work like wireless stereo headphones.

WHY RESOUND WIRELESS TECHNOLOGY LEADS THE INDUSTRY

ReSound is the only manufacturer with a comprehensive range of seamlessly integrated 2.4 GHz wireless accessories. For your patients, this means excellent sound quality and robust connections, all with the same pairing protocol and low latency.

So your patients don’t have to choose between the best hearing aid, the best wireless accessories or MFi connectivity. They can have it all.
**Compatible with all ReSound wireless hearing aids**

**FM receiver required**

The ReSound Micro Mic and ReSound Multi Mic are discreet, clip-on microphones that increase signal-to-noise ratio so your patients can understand speech in challenging listening environments.

**Resound Micro Mic**
Extremely easy to use, the ReSound Micro Mic pairs to any ReSound hearing aid in seconds. When your patient clips it on to the clothing of the person they want to hear, they can enjoy conversation even in background noise. With a range of up to 80 feet, the ReSound Micro Mic is ideal for use on shopping trips, in busy restaurants or for talking in the car.

**Resound Multi Mic**
The ReSound Multi Mic can do everything the ReSound Micro Mic can and more. Placed flat on the table, the ReSound Multi Mic automatically turns into a table microphone so your patients can hear what everyone around the ReSound Multi Mic is saying. The ReSound Multi Mic also connects to FM** and loop systems, and has a mini-jack input for streaming audio from virtually any device with a headphones output.

**ReSound Micro Mic**

*Compatible with all ReSound wireless hearing aids*

**FM receiver required**

---

**ReSound Micro Mic**

- Significantly improves signal-to-noise ratio in noisy situations
- Delivers exceptional speech understanding
- Extends patient’s hearing up to 80 feet*

**ReSound Multi Mic**

- Can do everything the ReSound Micro Mic can and more
- Automatically turns into a table microphone
- Connects to FM** and loop systems
- Has a mini-jack input for streaming audio

---

**Actual size**

---

**ReSound Multi Mic**

- Place it on the table and it automatically switches into an omni mode, optimized for picking up sounds around the ReSound Multi Mic.
- Connect to an FM system** and stream sound.
- Plug into virtually any mobile device or computer and stream sound.
- Connect to an FM system** and stream sound.
- Rechargeable 11 hour battery life.
- Rechargeable 11 hour battery life.
- Robust clothing clip rotates 360° for optimal voice pick-up.
The ReSound Phone Clip+ is a discreet device that connects wirelessly to Bluetooth-enabled phones. It streams the caller’s voice directly to your patient’s hearing aids, while the microphone on the ReSound Phone Clip+ picks up their own voice. If background noise begins to intrude, there’s a mute button that deactivates the hearing aids’ microphones.

**STREAM AUDIO**

The ReSound Phone Clip+ is not just for phone calls. Your patients can stream any audio coming from their phone, such as music. With the ReSound Phone Clip+, their hearing aids work like wireless stereo headphones.

**CONTROL**

They can even use the ReSound Phone Clip+ as a basic remote control to adjust hearing aid volume and change programs.

**PUT CONTROL AT THEIR FINGERTIPS**

For patients who find it tricky to use the buttons on their hearing aids, the ReSound Remote Control and the ReSound Remote Control 2 give them intuitive control over their volume and program settings. Its large buttons also give them access to all of their ReSound streaming accessories.

**RESOUND PHONE CLIP+**

Patients can make crystal clear phone calls, mute background noise while they talk, or stream music, podcasts or any other audio from their phone.

**RESOUND REMOTE CONTROL**

Intuitive control over volume and program settings with large, easy to use buttons.

**RESOUND REMOTE CONTROL 2**

Patients can adjust the volume or mute their hearing aids, switch programs, and see all settings at a glance.

The ReSound TV Streamer 2 makes it easy for the whole family to watch TV together at a volume that’s comfortable for everyone.

**EASY TO CONNECT**

Your patients can simply plug the ReSound TV Streamer 2 into their TV, music system or computer. Once it is paired to their ReSound Smart Hearing aids*, they can enjoy crystal clear stereo sound, and listen at their volume while others around them listen at theirs. If your patients leave the listening range and come back within five minutes, their hearing aids will automatically reconnect.

**WATCH AND CHAT AT THE SAME TIME**

Your patients can use their ReSound Smart 3D app, ReSound Remote Control or ReSound Remote Control 2 to adjust the volume of their hearing aid microphones and the TV independently. This means they can chat with whoever is sitting next to them, or they can mute their hearing aid microphones altogether and concentrate on the TV program.

* Compatible with all ReSound wireless hearing aids.
Award winning app for a personalized hearing experience

With the ReSound Smart 3D™ app, your patients can personalize their hearing experience from an iPhone or Android smartphone, or even an Apple Watch.

**DISCREET ADJUSTMENTS**
The ReSound Smart 3D app allows your patients to personalize their hearing experience and adjust volume, treble, middle and bass frequencies anywhere, find misplaced hearing aids and save favorite programs all without having to touch - and draw attention to - their hearing aids.

**PERSONAL WIRELESS NETWORK**
Your patients can control their other ReSound streaming accessories, too. They can turn up the volume of their ReSound Micro Mic or ReSound Multi Mic when they want to focus on what the person wearing it has to say - and turn it down when they don’t. And, when their favorite program comes on TV, they can switch to their ReSound TV Streamer 2 with a couple of taps on their smartphone.

Enhance sound in challenging sound environments

The ReSound Smart 3D app includes three advanced features in the Sound Enhancer:

**SPEECH FOCUS**
This enables your patients to make three directional beamwidth adjustments.

**COMFORT IN NOISE**
Your patients can reduce noise levels in loud environments so listening is more comfortable and understanding speech takes less effort.

**COMFORT IN WIND**
Your patients can adjust the wind filter to reduce the amount of intrusive wind noise for maximum listening comfort.

**TINNITUS MANAGEMENT**
If you activate Tinnitus Management in your patient’s hearing aids, they can fine-tune the sound therapy with adjustments to pitch and modulation, or they can choose between six different nature-inspired sounds.
Discreet control for all wireless hearing aids

**Easy setup with Phone Clip+**
If your patient has a wireless hearing aid or smartphone not compatible with the ReSound Smart 3D app, the ReSound Control app is a good and discreet solution for adjusting volume, changing programs and controlling streaming accessories such as the ReSound Micro Mic, ReSound Multi Mic or ReSound TV Streamer 2. The ReSound Phone Clip+ is needed to use the ReSound Control app.

**Resound Control App**
Your patients can change volume, switch programs and balance the volume of their wireless hearing aids with their ReSound streaming accessories. With the ReSound Control™ app, adjusting volume or changing programs is as easy as a tap and a swipe.
