PRODUCT DATA SHEET

FALCON WATER CONNECTIONS

Clack™ Quick Disconnect Water CONNECTOR

Description

Falcon corrugated stainless steel water connector is a flexible tube that is used to connect water appliances to water supply lines. It is made of high-quality 304 stainless steel helical tube construction with chrome plated brass nuts. Clack™ Quick Disconnect is designed to be used with only Clack water softener bypasses. Each Clack connection needs a CLACKSET for proper installation to bypass. In addition to being durable and long-lasting, corrugated stainless steel water connectors are easy to install and require no special tools.

These connectors are ideal for use in residential and commercial applications and are designed to withstand high pressure and temperature fluctuations. The chrome plated brass nuts at either end of the connector provide a secure and leak-proof connection to the water supply line.

Clack™ Quick Disconnect is only to be used on Clack water softener bypasses.

Application

Flexible stainless steel tube for connecting water supply lines to water appliances.

- 250 Maximum PSI
- -40°F to 180°F

Recommended Use

- Clack Water Softeners

Characteristics | Features

- 304 Series stainless steel
- Maintains optimal flow with full port design
- 100% Leak tested
- Chrome plated brass nuts
- High temp EPDM washer chlorine and chloramine resistant

Approvals

- Complies to ASME A112.18.6-2017
- Complies to CSA B125.6-2017
- ICC listed, tested & certified
- UPC, IPC, NPC, IRC compliant
- Complies to Minnesota plumbing code
- NSF 61 compliant
- NSF 372 compliant
