Description

ArmorPad™ is a high-strength and light-weight equipment pad that provides support and lift for the outdoor unit. It is constructed of a dense foam core base enveloped in a shell of durable polymer on five sides that aesthetically simulates the texture and color of gray concrete. The entire product line of 24, 30, 32, 36, and 40-inch-square (61, 76, 81, 91, 101-cm) x 3-inch-high (7.6-cm) models needs only one person to transport and install.

The ArmorPad polymer shell is molded into a one-piece, strong and durable extrusion that's compliant with ASTM D-2299 standard. The polymer surface perpetuates a brand new appearance, because of its built-in resistance to UV degradation, coil cleaning chemicals, landscaping chemicals, weather and urine. The foam core bottom features a unique foil-backing that resists moisture and contains an EPA registered insecticide built-in to protect the product.

Applications

Recommended for residential and commercial HVAC units, ArmorPad provides support and lift for the HVAC condenser unit outdoor. It provides a strong and stable equipment platform for uneven surfaces.

Characteristics | Features

- Light-weight at less than 11 lbs
- Extreme durability with load capacity of more than 1400 lbs
- High anchoring strength for securing equipment
- Solid-fill interior
- Textured surface to prevent equipment sliding
- Long-term exterior weather resistance including UV resistance, and freeze and thaw resistance
- Vibration absorbing
- Chemical resistance against R-407c and R-410A, compressor oil, coil cleaners, and salt solution
- Contains an EPA registered insecticide built-in to protect the product
- Does not chip and is not damaged by weed trimmers
