**Description**

RectorSeal® EP-200 (2 oz.) / EP-400 (4 oz.) epoxy putty is a pre-measured kneadable reinforced epoxy putty stick that cures like steel within 15 to 20 minutes of mixing at room temperature (77°F). The epoxy is extremely tough and durable with exceptional adhesion to a wide range of surfaces.

After an hour, it can be drilled, tapped, sanded, painted, filed or machined. It can be used to bond, seal, plug, mold or rebuild many different surfaces. The epoxy is capable of withstanding temperatures up to 500°F and will even harden under water.

**Applications**

RectorSeal EP-200 or EP-400 epoxy putty has a wide variety of uses in:

- Plumbing: Pipes (copper, steel, PVC), Joints, Fixtures, Spas, Drains, Dishwashers, Waterheaters, etc.
- A/C Heating: Ductwork, Unit Bodywork, Fans/Blowers, etc.
- Electrical: Motor Housings, Shafts, Fixtures, etc.
- Industrial: Machinery, Pumps, Housings, etc.
- Automotive: Gas Tanks, Engine Blocks, Fans, Mufflers, Oil Pans, Radiators, etc.
- Marine: Body Repair, Engine Repair, Ladders, Trim, Motors, etc.
- Farm: Implements, Tools, Machinery, etc.
- Home: Furniture Repair, Hole Patching, Cabinets, Doors, Wood Repairs, Stripped Threads, Appliances, etc.

Can be used on Steel, Wood, Aluminum, PVC, Fiberglass, Copper, Ceramics, Bronze, Iron, etc.

**Directions for use**

1. Thoroughly clean surface to be repaired, removing any grit, grease or paint. For best adhesion, roughen area with emery cloth, sandpaper or file before applying.
2. Wearing gloves, remove wrapper from putty and cut or break off enough for desired repair. Knead until mixture is one uniform color.
3. Apply at once. Shape, smooth and remove any excess putty before putty hardens. Use a putty knife or fingers to press putty into any cracks or depressions. Use within 2–3 minutes after mixing. At room temperature, putty will begin to harden in 5–10 minutes. Sets hard in 15–20 minutes and can be sanded, drilled, machined or filed in one hour.
4. Wash hands with soap and water immediately after use.

**Characteristics | Features**

- Premeasured resin and hardener in one tube
- Pressure tested to 1300 psi
- Contains no asbestos
- Can withstand temperatures continuously up to 500°F
- Easy to use – bonds, seals, plugs, molds, and rebuilds
- Conveniently available in both 2 oz. (EP-200) and 4 oz. (EP-400) sizes in a neutral gray color
- No special tools needed
- Permanent repair
- Can even harden under water
- Certified to NSF/ANSI/CAN 61
