GHS Label elements, including precautionary statements

GHS06: Toxic
GHS09: Environmental Hazard
Signal Word: Danger

Hazard Statements:
H301 - Toxic if swallowed.
H313 - May be harmful in contact with skin.
H315 - Causes skin irritation.
H319 - Causes serious eye irritation.
H400 - Very toxic to aquatic life.

Precautionary Statements:
P273 - Avoid release to the environment.
P301 + P310 - IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Summary Of Acute Hazards
Corrosive to the eyes and mucous membranes. Moderately toxic dermatally. Irritating to the gastric mucosa. See below for route-specific details.

Route Of Exposure, Signs And Symptoms

INHALATION
May cause irritation to mucous membranes. Avoid inhaling dust or mist. Strong irritant to the nose and throat.

EYE CONTACT
Corrosive to eyes. Exposure to the granules may cause severe eye damage. May cause severe irritation with redness, pain, and blurred vision.

SKIN CONTACT
Slight skin irritant. Excessive exposure, especially if prolonged, may cause allergic contact dermatitis. May cause irritation or burns on wet skin. Moderately toxic through skin absorption.

INGESTION
Ingestion of copper may result in irritation of the gastrointestinal tract, nausea, vomiting, salivation, gastric pain, hemorrhagic gastritis, diarrhea, capillary damage, liver and kidney damage, and central nervous system stimulation followed by depression. Jaundice, pain in the liver, and hemolytic anemia have been reported following acute human poisonings.

SUMMARY OF CHRONIC HAZARDS
Exposure to human tissue will result in irritation and chemical burns.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE
Individuals with pre-existing or chronic diseases of the eyes, skin or persons with chemical sensitivity may have increased susceptibility to excessive exposures.
SECTION 3 – COMPOSITION/INFORMATION ON INGREDIENTS

Ingredient: Copper Sulfate
Percentage By Weight: 99
CAS Number: 7758-99-8
EC#: 231-847-6

SECTION 4 – FIRST AID MEASURES

If inhaled: If overcome by exposure, remove victim to fresh air immediately. Give oxygen or artificial respiration as needed. Obtain emergency medical attention. Prompt action is essential.

If on skin: Flush with large amounts of water. If irritation or burns occur, seek immediate medical attention.

If in eyes: Flush with large amounts of water for at least 15 minutes. Get medical attention if irritation persists.

If swallowed: If swallowed, call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person.

SECTION 5 – FIRE FIGHTING MEASURES

Extinguishing Media
Use agents suitable for surrounding fires.

Special Fire Fighting Procedures: Wear self-contained breathing apparatus (SCBA) and other protective clothing. Hazardous decomposition products possible (see Section 10). Dike area as run-off may create additional environmental contamination.

Unusual Fire And Explosion Hazards: Thermal decomposition may release toxic fumes and/or hazardous gases. Sulfur trioxide occurs above 1200°F (650°C).

SECTION 6 – ACCIDENTAL RELEASE MEASURES

Steps To Be Taken In Case Material Is Released Or Spilled: Keep people away. Wear chemical protective clothing. Sweep up and place in an appropriate chemical waste container for disposal.
Section 7 – Handling and Storage

Precautions To Be Taken In Handling And Storing: Store in a clean, dry area. Do not store near feed, food or within the reach of children.

Other Precautions: Do not reuse empty containers.

KEEP OUT OF REACH OF CHILDREN.
