To whom it may concern:

Fieldpiece Instruments engineering team has performed compatibility testing with *A/C Leak Freeze's* product *AC Leak Freeze*TM on Fieldpiece Instruments manifolds. The sealing product was exposed to parts of the manifolds that would come in contact with such a substance during regular use in the field. Testing indicated no adverse effects to the performance of manifolds exposed to the sealing product.

As a result, Fieldpiece considers *A/C Leak Freeze's* product *AC Leak Freeze*TM a compatible substance for use with our manifolds. Exposure to this substance as part of normal field use will not void the warranty of these products.

Regards,

Demian Mendez
