LIMITED WARRANTY. RectorSeal® warrants to the original consumer purchaser ("Purchaser") of its product, EZ Trap®, that it is free from defects in material or workmanship. If within two years (24 months) from the date of the original consumer purchase this product shall prove to be defective, it shall be repaired or replaced at RectorSeal's option. Your original receipt of purchase is required to determine warranty eligibility. This warranty does not cover replacement labor or any cost, claim or incident to any defect nor does it cover freezing or any other consequential damages. The sole liability of the manufacturer under this warranty is limited to the replacement of defective product. Product damaged by improper use, accident, neglect, alteration, abuse or improper installation is excluded from this warranty.
**Installation Instructions**

**Model No.**

83205

(EZT 205)

**Trap Assembly Instructions**

1. Screw Adaptor (A) into 3/4" primary drain pan outlet.
2. Dry fit, and mark components. Rotate U-Bend (D) and Outlet Tee (E) to required angles for installation.
3. Glue components (B thru E) using dry fit markings. Glue assembly into Adaptor (A).
4. Glue Drain Line (F) into center leg of Outlet Tee (E). Drain Line must exit building with at least a 5° angle.
5. Press fit Float Switch (K) into opening at top of Inlet Cross (C). DO NOT USE GLUE. Check that Actuator Arm moves freely inside Inlet Cross.
6. Check that Drain Caps (G) are tightly secured.
7. Press plug end of Modular Cable (J) into Float Switch Assembly (K).
8. Attach service & cleaning labels as indicated.

**Wiring Instructions**

1. Turn off power at main panel before opening unit and working on electrical system.
2. An inline fuse is necessary to protect the 24V circuit.
3. Connect Float Switch using wiring diagram. (below)
4. Test system for proper operation by lifting float.

**Important:** Install in strict accordance with RectorSeal® instructions as well as all applicable local plumbing, drainage and electrical codes.

**Note:** Insulation is required when trap is installed in unconditioned space where sweating can occur.
