**Overflow Switch Assembly Instructions**

1. Screw Street Ell (A) into 3/4” drain pan overflow outlet. Ell must be plumb.
2. Press fit Float Switch Assembly (B) into 1” opening at top of Street Ell (A). DO NOT USE GLUE. Check that Actuator Arm and Float moves freely inside Ell.
3. Press plug end of Modular Cable (C) into Float Switch Assembly (B).
4. Attach service & cleaning labels as indicated.

**Note:** Insulation is required when trap is installed in unconditioned space where sweating can occur.

**Wiring Instructions**

1. Turn off electrical power at main panel before installing EZ Trap switch.
2. An in-line fuse is necessary to protect the 24V circuit.
3. Connect Float Switch using wiring diagram. (below)
4. Test system for proper operation by lifting float.

**Operating Procedure**

Should blockage occur in the condensate drain line, the float will lift to stop operation. To reset, press center button on switch.

**Note:** Wiring diagram shown cuts power to thermostat when float switch operates to stop operation of the A/C unit. To inhibit mold growth during long absences, connect terminals into yellow cooling circuit so when float switch operates, condenser will switch off but fan will continue running.
