• Single package portfolio
• Easy installation, intuitive splicing
• Movement up to 36” max open
• Test and listed in accordance with UL 2079 and ASTM E 1966
Introducing the industry’s highest-performing fire barriers for large expansion joints. Greatly improved over Balco’s previous system, these products significantly simplify the installation process, cutting installation time in half. With quality features and unique additions, these are ideal products for fire-rated seismic joints, surpassing fire resistance and movement testing requirements of test standards UL 2079 and ASTM E 1966.

- Bold single package with rigid side flanges serving to hold the fire barrier rigidly in place for a convenient drop-in installation
- Sides are lined with Metacaulk®’s BlazeSeal™ intumescent strips, entirely eliminating the need for laborious caulking of firestop sealant along the sides of the joint
- Comes standard with male/female ends for easy and intuitive lap splicing
- Available up to 36” max open*

*36” max open does not apply to 3-hour MetaFlex Pro (MPF3H).
**APPLICATION**
- Fire-resistant barrier for horizontal expansion joints (up to 36” max open*)

**FEATURES**
- Easy “drop-in” installation; no firestop sealant required
- Simple lap splicing
- Ships in 10’ (3m) lengths
- Doubles as smoke barrier
- Can be integrated with Balco Expansion Joint Systems

**PERFORMANCE**
- Fire resistance rating of 2 hours and 3 hours tested in accordance with ASTM E1966 and UL 2079
- BlazeSeal™ aging and environmental exposure tested in accordance with UL 1479
- Seismic, Thermal and Wind movement tested per standard ASTM E 1399
- Contributes to LEED® credits

**JOINT SIZES** (nominal)
- 6-24” (150-450mm)

**MOVEMENT**
- ±50% to ±100% Expansion/Contr.

---

*36” max open does not apply to 3-hour MetaFlex Pro (MPF3H).
APPLICATION
• Fire-resistant barrier for horizontal expansion joints (up to 36” max open)

FEATURES
• Mounts to underside of floor slabs when access from above is limited
• Simple lap splicing
• Ships in 10’ (3m) lengths
• Can be integrated with Balco Expansion Joint Systems

PERFORMANCE
• Fire resistance rating of 2 hours tested in accordance with ASTM E1966 and UL 2079
• BlazeSeal™ aging and environmental exposure tested in accordance with UL 1479
• Seismic, Thermal and Wind movement tested per standard ASTM E 1399
• Contributes to LEED® credits

JOINT SIZES (nominal)
6-24” (150-450mm)

MOVEMENT
±50% to ±100% Expansion/Contr.
