## Are you ready to approach an automation solutions provider?

This checklist will help you decide if your business is ready to approach an automation supplier.

1With your current production methods, are you unable to satisfy customer demand for your product(s)?
$\square$ Yes $\square$

2 Do you experience unacceptably high reject rates?

Do you struggle with persistent waste? $\square$ Yes $\square$ No

Are you experiencing issues in one or more of these areas:

- Work in process levels
- Product contamination
- Performance consistency from one operator to the next $\square$ Yes $\square$
- Product quality
- Floor space overcrowding and limited expansion capability
- Manufacturing location

Do you have a proliferation of product variants that are adding complexity and strain to your production schedule?
$\square$
$\square$

Do you have high labour costs considering number of employees, wages, training, recruiting, and absenteeism?

Are continuous improvement initiatives insufficient to achieve your annual product cost targets?

8Does your product have rigorous cleanliness requirements that would be compromised with manual manufacturing methods?
$\square$
$\square$

If you answered "Yes" to three or more questions, it's time to consider approaching an automation solutions provider. For a free consultation on your next project, contact ATS Automation.
