PRODUCT INFORMATION: Korrekt[®] is a highly available mild form of potassium which is particularly well suited for foliar feeding for all types of crops and may be soil applied. Since the pH is 7.3 and the salt index is 26, there is little danger of burn to plant leaves and foliage. Korrekt is a clear, true solution with no particulate matter, which mixes readily in water. The natural organic carrier enhances its receptivity by plants. This product contains no chlorides or ammonium (NH₄) forms of nitrogen.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. Korrekt is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

Soil Application: Apply 2x2 or at sidedress or topdress. Use caution when applying directly on the seed in saline, alkali, or coarse textured soils.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
