Manganese (Mn).....	5.0%
5.0%.....Chelated Manganese	
Derived from: manganese sulfate	

**PRODUCT INFORMATION:** Eezy Man Gen II is formulated to achieve compatibility with most selective and non-selective pesticides commonly tank mixed. A proprietary blend of chelating agents preserves the efficacy of the pesticides while maintaining the availability of the manganese. Eezy Man Gen II is recommended for foliar application on crops that often require manganese. Manganese accelerates maturity and is essential for carbohydrate and nitrogen metabolism and in chlorophyll production.

**DIRECTIONS FOR USE:** Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. Eezy Man Gen II is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit [AndersonsPlantNutrient.com/Tank-Mix](http://AndersonsPlantNutrient.com/Tank-Mix).

**Foliar Application:** Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

**RECOMMENDED RATES:** This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.

	Application	Use Rate (per acre)	Timing
Field & row crops	Foliar	1-2 quarts (with 10-20 gallons of water)	Post emergence
Turf*	Foliar	1-3 quarts (0.75-2 ounces/1000 ft <sup>2</sup> )	Every 7-14 days or to correct nutrient deficiencies

\*Do not mix with glyphosate for turf
