WARNING: This fertilizer contains boron and molybdenum. Its use on any crops or under conditions other than those recommended may result in serious injury to the crops. Crops high in molybdenum are toxic to grazing animals.

PRODUCT INFORMATION: Easy Moly-B provides essential micronutrients, molybdenum and boron, when used. Molybdenum is responsible for a variety of essential functions in the plant, mainly nitrogen metabolism. Boron is complimentary to molybdenum and is responsible for cell wall structure, sugar transport, cell division, and seed and grain formation. Easy Moly-B is safe for foliar and soil application on a variety of crops.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. Easy Moly-B is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (Jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

Soil Application: Broadcast or at sidedress or topdress. Do not apply directly on the seed.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
