#### GUARANTEED ANALYSIS

Total Nitrogen (N) .....	8.0%
8.0%...Nitrate Nitrogen	
Calcium (Ca) .....	10.0%
9.7%...Water Soluble Calcium	
Boron (B) .....	0.25%
Derived from: boric acid, calcium nitrate	

**CAUTION:** This fertilizer contains boron. Its use on any crops or under conditions other than those recommended may result in serious injury to the crops.

**PRODUCT INFORMATION:** Eezy Cal-B is a true solution that combines the benefits of calcium and boron in an immediately available form for plants. Both calcium and boron are essential nutrients for plant growth and reproduction. Plants use calcium directly in their cell structure and as a buffer for other elements that are absorbed by the plant. Calcium in an available for aids in freeing up other calcium and nutrients in the soil. Boron's primary benefit relates to the reproductive functions of fruit and seed set. Boron aids in the ability of the plant to maximize the benefits of calcium uptake and absorption.

**DIRECTIONS FOR USE:** Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. Eezy Cal-B is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (Jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit [AndersonsPlantNutrient.com/Tank-Mix](http://AndersonsPlantNutrient.com/Tank-Mix).

**Soil Application:** Apply 2x2 or at sidedress or topdress. Do not apply directly on the seed in saline, alkali, or coarse textured soils.

**Foliar Application:** Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

**RECOMMENDED RATES:** This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
