

# COPPER 5%

## CITRIC CHELATED SOLUTIONS

### PRODUCT INFORMATION

Copper 5% is a chelated micronutrient formulated for foliar application. It is recommended for use as an additive in dry or liquid fertilizers and is compatible with most of the herbicides, insecticides, and agricultural chemicals that can be utilized in combination with liquid fertilizers. Copper 5% may not be compatible with some liquid fertilizer formulations.

### FEATURES

- Prevents plant stress
- Corrects and repairs nutrient deficiencies
- May be applied with glyphosate

### BENEFITS

- Safe on foliage
- Alleviates plant stress
- Provides essential micronutrients

### FREQUENTLY ASKED QUESTIONS

- Q: Can I mix Copper 5% with other products?**  
**A:** Yes, Copper 5% is extremely compatible with glyphosate and other herbicides, as well as nutrients.
- Q: Why does Copper 5% contain humectant**  
**A:** Humectant improves foliar contact by increasing absorption.
- Q: When should Copper 5% be used?**  
**A:** On corn, apply with glyphosate from V2-V10. On soybeans, apply with glyphosate from V6-R5.
- Q: Can Copper 5% be mixed with crop protection products?**  
**A:** Yes, Copper 5% is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit [AndersonsPlantNutrient.com/Tank-Mix](http://AndersonsPlantNutrient.com/Tank-Mix).

### GUARANTEED ANALYSIS

Sulfur (S) .....2.5%  
 2.5%...Combined Sulfur  
 Copper (Cu) ..... 5.0%  
 5.0%...Chelated Copper

Derived from: copper sulfate  
 Also contains non-plant food ingredient: citric acid

### PHYSICAL PROPERTIES

pH.....1.0-2.0  
 Specific Gravity.....1.2 @ 68°F  
 Density.....10.0 lbs/gal  
 Salt Out .....32°F

### APPLICATION

	Application	Use Rate (per acre)	Timing
Field & row crops; vegetables	Foliar	1-2 quarts	Post emergence
