

MICROSOLUTIONS

COPPER 7.5% EDTA CHELATED SOLUTIONS

PRODUCT INFORMATION

Copper 7.5% is a fully chelated solution of copper EDTA and is recommended for the prevention and correction of copper deficiency in all crops. Copper 7.5% is recommended for use on all soil types. The preferred use is soil application to prevent the deficiency although it may also be used as a foliar spray for correction.

FEATURES

- For use on all crops
- A fully chelated solution of copper
- Dark blue liquid
- Highly pure, clean, true solution

BENEFITS

- Essential for plant growth
- Regulator of plant respiration and reproduction
- Designed for use in all liquid fertilizers and suspensions
- Prevents and corrects copper deficiencies

FREQUENTLY ASKED QUESTIONS

- Q: Can I use EDTA chelated micronutrients in both soil and foliar applications?
- A: Yes, producers report great results when EDTA chelated micronutrients are used as soil or foliar nutrients.
- Q: Will EDTA chelated micronutrients work as part of a tank mix?
- A: Yes, EDTA chelated micronutrients are the best micronutrients to use when tank-mixing nutrients and pesticides.
- Q: Can EDTA chelated micronutrients be used with other products?
- A: EDTA chelated micronutrients should be compatible with fertilizer and crop protection chemistry in both soil and foliar applications. Always jar test for compatibility.

Q: Can Copper 7.5% be mixed with crop protection products?

A: Yes, Copper 7.5% is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.
