

EEZY™ MAN GEN II

MICRONUTRIENT-BASED SOLUTIONS

Eezy™ Man Gen II is a blend of manganese and sulfur designed for foliar application on crops that often require manganese. The product is formulated to achieve compatibility with most selective and non-selective pesticides commonly tank mixed. A proprietary blend of chelating agents preserves the efficacy of pesticides while maintaining the availability of manganese.

|--|--|--|--|
| <ul style="list-style-type: none"> • Micronutrient package featuring sulfur, boron, manganese, and zinc • Contains a humectant to increase foliar contact by increasing absorption • For use on all crops • Compatible with most herbicides*, fungicides, insecticides, and foliar fertilizers • Foliar applied  | <ul style="list-style-type: none"> • Contains 5% citric chelated manganese and 3.2% sulfur • Prevents and corrects manganese deficiency • For use on all crops • Compatible with most nutrients and pesticides • Foliar applied  | <ul style="list-style-type: none"> • Fully chelated solution of manganese EDTA • Designed for use in all liquid fertilizers and suspensions • For use on all crops • Compatible with most herbicides*, fungicides, insecticides, and foliar fertilizers • Soil or foliar applied  | <ul style="list-style-type: none"> • Contains 5% chelated manganese and 2% sulfur • Preserves the efficacy of applied pesticides while maintaining the availability of manganese • For use on all crops • Compatible with post-applied herbicides* • Foliar applied  |

FEATURES & BENEFITS

- Compatible with post-applied herbicides
- For use on soybeans, cotton, and other crops
- A highly pure, clean, true solution
- Contains no extraneous material or suspended particles
- Totally and immediately available to the plant
- Prevents and corrects manganese deficiencies
- Accelerates maturity and germination
- Essential for chlorophyll and carbohydrate production

FREQUENTLY ASKED QUESTIONS

Q: Can I mix Eezy Man Gen II with glyphosate?

A: Yes, Eezy Man Gen II is formulated to tank-mix with glyphosate without compromising weed kill.

Q: When should I use Eezy Man Gen II instead of Manganese 6% EDTA?

A: Eezy Man Gen II is a low-cost, yet effective manganese alternative if tank-mix permits. Always jar test for compatibility.

Q: Is manganese application beneficial when applying a herbicide?

A: Yes, prevention of manganese deficiency is cost effective. Manganese accelerates maturity and is essential for carbohydrate and nitrogen metabolism and in chlorophyll production. A high return on investment is expected when Eezy Man Gen II is used.

Q: Can Eezy Man Gen II be mixed with crop protection products?

A: Yes, Eezy Man Gen II is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

*Approved for tank mixing with select herbicides. Visit <https://andersonsplantnutrient.com/agriculture/tank-mix> for the most up to date product approval listings.
