

RGS[®] (ROOT GROWTH STIMULATOR)

POLY-COMPATIBLE SOLUTIONS

PRODUCT INFORMATION

RGS[®] contains 17% zinc and is designed for use in anhydrous ammonia, and liquid or dry fertilizers containing nitrogen. RGS may be banded with some starter fertilizers. RGS is not designed for water solutions and may not be compatible with high orthophosphate or acid fertilizers.

FEATURES

- Synergistic formulation of zinc and ammonium acetate
- Compatible with dry, liquid, or ammonia fertilizers

BENEFITS

- Promotes vigorous root development
- Improves nutrient efficiency
- Faster early-growth
- Greater resistance to stress

FREQUENTLY ASKED QUESTIONS

Q: What does RGS do?

A: RGS stimulates root systems to generate a greater volume of healthy roots.

Q: What does a healthier root system mean?

A: Healthy roots are critical for stabilizing the plant as well as moisture and nutrient uptake.

Q: How can I apply RGS?

A: RGS can be applied with dry fertilizer, anhydrous ammonia, or liquid fertilizer.

GUARANTEED ANALYSIS

Total Nitrogen (N).....14.0%
 14.0%...Ammoniacal Nitrogen
 Zinc (Zn)..... 17.0%
 Derived from: ammonia, acetic acid, zinc oxide

PHYSICAL PROPERTIES

pH.....11.5
 Specific Gravity.....1.27 @ 68°F
 Density..... 10.5 lbs/gal
 Salt Out0°F

APPLICATION

	Application	Use Rate (per acre)	Timing
Corn	Broadcast or banded	5-10 ounces (dry) or 72 ounces per ton anhydrous	Add to dry or liquid fertilizer
	2x2	5 ounces
