

MICROSOLUTIONS

ZINC 9% EDTA CHELATED SOLUTIONS

PRODUCT INFORMATION

Zinc 9% is a fully chelated solution of zinc EDTA and is recommended for the prevention and correction of zinc deficiency in all crops. Zinc 9% is recommended for use on all soil types. The preferred use is soil application to prevent the deficiency although it may also be used as a foliar spray for correction.

FEATURES

- For use on all crops
- A fully chelated solution of zinc
- Clear liquid
- Highly pure, clean, true solution
- Designed for use in all liquid fertilizers and suspensions

BENEFITS

- Necessary for seed and grain production
- Essential in plant cell oxidation and sugar usage
- Prevents and corrects zinc deficiencies

FREQUENTLY ASKED QUESTIONS

Q: Can I use Zinc 9% as a foliar?

A: Yes, producers report great results when Zinc 9% is used as a foliar nutrient.

Q: Will Zinc 9% work as part of a tank mix?

A: Yes, Zinc 9% is the best zinc to use when tank-mixing nutrients and pesticides.

Q: What makes Zinc 9% unique?

A: The QC/QA process used to qualify raw materials, the temperature-controlled manufacturing process, and the use of single-source tanks/plumbing ensures the same quality product is delivered every time.

Q: Can Zinc 9% be mixed with crop protection products?

A: Yes, Zinc 9% is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/ Tank-Mix.
