EEZY® K32

LIQUID POTASSIUM PRODUCTS

PRODUCT INFORMATION

Eezy K32 is a high concentration of water-soluble potash with low corrosion characteristics. Eezy K32 may be mixed in small quantities with starter fertilizer to stimulate seedling growth and/or applied at sidedress to enhance growth and crop yield.

FEATURES AND BENEFITS

- Low salt index
- Chloride-free
- Non-corrosive
- High availability to crops
- Low burn potential when foliar applied
- Compatible with many liquid fertilizers and pesticides

FREQUENTLY ASKED QUESTIONS

Q: Why should I apply Eezy K32?

A: Eezy K32 is perfectly suited for when your crops need additional potassium for maximum yield and quality. Eezy K32 is a highly soluble potassium source that is chloride free, has a low salt index and may be soil or foliar applied.

Q: Can I tank mix Eezy K32?

A: Eezy K32 can be tank mixed with most herbicides, fungicides, and insecticides fertilizers. Always jar test for compatibility.

Q: What is the role of potassium in crop production?

A: Potassium requirements spike in crops during rapid growth periods and seed development. Providing plants adequate potassium at the right time will ensure optimum crop yield and quality.

Q: How do I apply Eezy K32?

A: Eezy K32 can be applied in a 2x2 starter fertilizer application, at sidedress, or through drip irrigation.

GUARANTEED ANALYSIS

Soluble Potash (K₂O).....32.0%
Derived from: potassium carbonate

PHYSICAL PROPERTIES

pH.....11.0-13.1
Specific Gravity.....1.52 g/ml
Density.....12.5 lbs/gal
Salt Out8°F

APPLICATION

	Application	Use Rate (per acre)	Timing
Most crops	Soil (Broadcast)	1-2 gallons	Pre-emergence
	Soil (Sidedress)	1-2 gallons	At sidedress

Contact your dealer for questions regarding application for other crops
