FREQUENTLY ASKED QUESTIONS

Q: When is the most cost-effective time to apply liquid calcium nitrate?

A: A fall residue application soon after harvest is most cost-effective.

Q: What are the benefits when applying after corn and soybeans?

A: After soybeans there will be much less hair pinning in the spring. After corn there is less hair pinning, corn stalk breakdown, and degradation of chemicals.

Q: What are the additional benefits of liquid calcium nitrate?

A: The calcium nitrate will cause the seedbed area to be more pliable or seed friendly.

Q: Can Liquid Calcium Nitrate be mixed with crop protection products?

A: Yes, Liquid Calcium Nitrate is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.
