## EEZY<sup>®</sup> K

### LIQUID POTASSIUM PRODUCTS

#### PRODUCT INFORMATION

A neutral to basic, chloride-free solution containing 25% potassium and 17% sulfur. It can be blended with other fertilizers with a pH of 6.0 or above. Eezy K has the highest potassium and sulfur content on the market.

#### FEATURES

- Highly clean, pure, true solution
- For use on all crops

#### BENEFITS

- Optimal source of potassium for crops sensitive to chlorine
- Highly compatible with most fertilizers
- Clear liquid

#### FREQUENTLY ASKED QUESTIONS

**Q: What is the Eezy K composed of?**

A: Eezy K provides both sulfur and potassium in one easy to handle liquid product.

**Q: How do I apply Eezy K?**

A: Eezy K can be applied in a 2x2 starter fertilizer application, at sidedress, or through drip irrigation.

**Q: What does potassium do for crops?**

A: Potassium requirements spike in crops during rapid growth periods and seed development. Providing plants adequate potassium at the right time will ensure optimum crop yield and quality.

**Q: What does sulfur do for crops?**

A: Sulfur is essential for protein formation during crop development. It is also involved in the syntheses of hormones and in electron transfer reactions critical for proper seed development.

#### GUARANTEED ANALYSIS

Soluble Potash (K<sub>2</sub>O).....25.0%  
 Sulfur (S) ..... 17.0%  
 Derived from: potassium thiosulfate

#### PHYSICAL PROPERTIES

pH..... 7.0  
 Specific Gravity.....1.46 @ 68°F  
 Density.....12.2 lbs/gal  
 Salt Out .....3°F

#### APPLICATION

	Application	Use Rate (per acre)	Timing
Most crops	Soil (Broadcast)	1-2 gallons	Pre-emergence
	Soil (Sidedress)	1-2 gallons	At sidedress

Contact your dealer for questions regarding application for other crops
