PRODUCT INFORMATION: Season Pass with MicroCarb features essential nutrients and a carbon source to maximize early season growth. The addition of carbon increases soil cation exchange capacity, improving nutrient availability. This formulation of Season Pass with MicroCarb is an 80/20 ratio of ortho-to-polyphosphate. The use of Season Pass with MicroCarb GoldStart encourages quicker crop emergence, growth, crop maturity and dry down.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not mix with calcium based fertilizers. Do not allow to freeze. Always jar test for compatibility. **For farm-use only.**

Soil Application: Apply in-furrow, 2x2, or at sidedress or topdress. Use caution when applying directly on the seed in saline, alkali, or coarse textured soils.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
