CAUTION: This fertilizer contains boron. Its use on any crops or under conditions other than those recommended may result in serious injury to the crops.

PRODUCT INFORMATION: Korrekt® Plus is a combination of a highly available, mild form of potassium, EDTA chelated manganese, and a safe, effective source of boron. It is well suited for foliar feeding of all crops. It may also be soil applied. Korrekt Plus is a clear, true solution with no particle matter and mixes readily in water. It includes a natural organic carrier that enhances its receptivity by plants. The product contains no chlorides or ammonium forms of nitrogen.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. Always jar test for compatibility.

Soil Application: Apply 2x2 or at sidedress or topdress. Use caution when applying directly on the seed in saline, alkali, or coarse textured soils.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
