GUARANTEED ANALYSIS

Total Nitrogen (N).....	8.0%
8.0%.....Ammoniacal Nitrogen	
Zinc (Zn)	10.0%
Derived from: zinc chloride, anhydrous ammonia, zinc sulfate	

PRODUCT INFORMATION: Nulex ammoniated complexes are designed to mix with ammonium polyphosphate (APP) solutions and are compatible with UAN and ammonium thiosulfate. When applied with a liquid starter in a concentrated band underneath the soil surface at planting, Nulex can be ten times more effective than dry broadcast zinc. Application of zinc with phosphate fertilizer optimizes uptake of P and Zn in plants which enhances fertilizer efficiency and plant utilization when applied at correct rates.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Nulex Zinc, by itself, should not be applied directly on the seed. Do not allow to freeze. Always jar test for compatibility.

Soil Application: Apply 2x2 or at sidedress or topdress. Do not apply on seed.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
