DG Gypsum™

Dispersing Granule Technology

- **Dispersing granule formula**
- **Provides calcium and sulfur**
- **Increases water penetration into the soil**
- **Pelletized for easy application**
- **Loosens hard packed soil***
*Saline-sodic soils

GUARANTEED ANALYSIS

Calcium Sulfate Dihydrate (CaSO ₄ • 2H ₂ O)	86.0%
Calcium (Ca)	21.0%
Sulfur (S)	16.0%
16.0% Combined Sulfur (S)	

Derived from sulfate and mined gypsum.

Moisture content does not exceed	1.0%

DIRECTIONS FOR USE

Apply only as directed. For use on turf, in gardens, and around trees, shrubs and flowers. This product is pH neutral and will not increase soil pH. Applied to saline-sodic soils, the gypsum will loosen the heavy, hard packed soil, allowing water and air to penetrate and move freely in the soil.

When establishing a new turf area, apply 40-100 lbs per 1,000 sq. ft. prior to seeding. Till or rake thoroughly into the top 3" of soil. Water well after application. High clay soils will require a higher rate.

For corrective action on established turf areas, apply 25-40 lbs. per 1,000 sq. ft. in the Spring and Fall. On higher clay or heavily compacted soils, apply 80 to 130 lbs. of product.

Apply 6 to 12 lbs. per 1,000 sq. ft. to maintain proper soil conditions on established turf.
Apply 1 to 2 times per year, in the spring and fall.

For gardens, mix in 10-20 lbs. per 100 sq. feet. Place 1-2 cups around each rose bush in the Spring and Fall. For trees, shrubs and flowers, apply 2-4 cups around the base of smaller plants and 4-6 cups around the base of larger plants.

To repair larger areas damaged from winter salt and fertilizer apply 20-40 lbs. per 10 sq. feet.
For smaller areas, such as animal spots, apply ½ - ¾ cup per square foot.

To aid in the generation of compost, spread approximately 2 cups over the top of the material in the cart as it is dumped into the compost pile. Treat daily, adding 2 cups per day until the compost is complete. This will take approximately 1 ½ weeks.

WARNING
May cause mild eye irritation
May cause respiratory irritation

Precautionary Statements:

- Call a poison center / physician if unwell
- If skin irritation occurs, get medical advice
- If in eyes, rinse cautiously with water for several minutes - remove contacts lenses
- If eye irritation persists, get medical advice
- Wash hands after handling
- Use only outdoors or in well ventilated areas
- Avoid breathing dust
- If inhaled, remove to fresh air and keep at rest in a position comfortable for breathing
- Store container tightly closed
- Dispose of contents / container in accordance with national / regional / local regulations

First Aid

If inhaled: Move victim to fresh air. Seek medical attention if irritation persists.

If on skin: Wash affected areas with soap and water. Seek medical attention if irritation persists. Wash contaminated clothing before re-use.

If in eyes: Immediately flush with water for at least 20 minutes. Seek medical attention if irritation persists.

If swallowed: If victim is alert and not convulsing, give one glass of water to dilute material. Seek immediate medical attention.

For all applications:

Immediately after application, apply a minimum of 0.5 inches of water to disperse particles into the root zone. Due to variations in temperature and water pH, best results are achieved by splitting the irrigation into 2 applications at 10-15 minutes apart. This will allow for more thorough particle dispersion into the root zone.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.

Suggested Spreader Settings						
These suggested spreader settings are not intended to replace calibration. Please calibrate your spreader before applying product.						
SPREADER	GROUND SPEED	WIDTH OF COVERAGE	SPREADER SETTINGS			
			LIGHT RATE 6 lbs/1,000 sq. ft.	LOW RATE 12 lbs/1,000 sq. ft.	MEDIUM RATE 20 lbs/1,000 sq. ft.	HIGH RATE 25 lbs/1,000 sq. ft.
Andersons Model 2000 / AccuPro 2000 (cone 9); Andersons 2000 SR / SR-2000 (cone 9)	3 mph	10 feet	L 1/2	Q	X	Z
Scotts R-8, R-8A (cone 9)	3 mph	10 feet	K	O 1/2	V 1/2	X 1/2

Fineness of Grind

Prior to pelletizing or testing by wet sieve method:

Minimum Passing	U.S. Standard Sieves
100%	8 MESH
99%	20 MESH
79%	40 MESH
66%	60 MESH
60%	100 MESH

IMPORTANT: READ BEFORE USE:

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or Buyer accepts the following Warranty Disclaimer and Limitation of Liability:
