WARNING

PRECAUTIONARY STATEMENTS

MAY BE HARMFUL IF SWALLOWED MAY CAUSE MILD SKIN IRRITATION MAY CAUSE EYE IRRITATION MAY CAUSE RESPIRATORY IRRITATION

Call a poison center/physician if unwell. Wash hands after handling. Use only outdoors or in well ventilated areas. Avoid breathing dust. Store container tightly closed. Dispose of contents/container in accordance with national/regional/local

FIRST AID

If swallowed: If victim is alert and not convulsing, give one glass of water to dilute material, but DO NOT induce vomiting. Seek immediate medical attention.

Wash affected areas with soap and water. Seek medical attention if irritation persists Wash contaminated clothing before reuse. Immediately flush with water for at least 20

minutes. Seek medical attention if irritation persists.

> Move victim to fresh air. Seek medical attention if irritation persists.

GENERAL INFORMATION

Humic DG is a uniform granule which utilizes The Andersons proprietary dispersible granule (DG) technology. Each granule will disperse into thousands of particles with irrigation or rainfall, facilitating incorporation of the product into the soil. The hard granule has a low moisture and dust content, allowing it to be easily blended with other components, such as urea-based fertilizers.

Humic acid products, such as Humic DG may increase or enhance micronutrient uptake while improving and replenishing depleted soils.

DIRECTIONS FOR USE

Apply as directed or as advised by your Andersons representative or local agronomist. Some situations will require higher use rates and/or more frequent applications to produce significant benefits.

For best results, after application, water area with a minimum of 0.3 inches of water. Product will self-incorporate into coarse textured soils. Cold weather and/or cold water (lower than $45^{\circ}F / 7^{\circ}C$) can result in slower particle dispersion.

Humic DG can be applied to all crops, including vegetable crops, row crops, herbs and field crops; trees; shrubs; vines; turf; ornamentals; nursery; xeriscaping; garden landscaping

CROPS (BROADCAST) - Apply at 40 pounds per acre or higher as a broadcast treatment, one to two times annually. Best when applied in fall, post-harvest or early spring. May be used at pre-plant up to first blossom or anytime fertilizer is applied. For severely carbon depleted soils, apply 40-500 pounds per acre.

CROPS (IN-FURROW/BANDED) - Apply 4 -10 pounds per acre in-furrow or as a banded treatment.

TURF - Apply 40-200 pounds per acre per year. Apply 1-2 lbs. per 1,000 sq. ft. anytime during the growing season. Can be applied after aeration as a top-dress treatment. If desired, mix with the sand media. Apply and water-in for self incorporation. Make additional applications to deficient areas.

TREES, SHRUBS - Apply 2-8 oz. as a band around the base of each tree or shrub. Larger trees and shrubs should use the higher rate.

ORNAMENTALS AND BEDDING PLANTS - Apply 1-2 pounds per 1,000 sq. ft. as a broadcast treatment in ornamental landscaping and garden areas.

POTTING SOILS - Mix 2-10 lbs. per cubic yard of potting mix.

Suggested Spreader Settings These suggested spreader settings are not intended to replace calibration. Please calibrate your spreader before applying product. 40 lbs. feeds 40,000 sq. ft. (0.92 acre) at the LOW RATE 40 lbs. feeds 20,000 sq. ft. (0.46 acre) at the MEDIUM RATE

40 lbs. feeds 10,000 sq. ft. (0.23 acre) at the HIGH RATE					
SPREADER	GROUND SPEED	WIDTH OF COVERAGE	LOW RATE 1.0 lbs/1,000 sq.ft.	MEDIUM RATE 2.0 lbs/1,000 sq.ft.	HIGH RATE 4.0 Ibs/1,00 sq.ft.
