Soluble Potash (K<sub>2</sub>O).....24.0%  
Derived from: potassium acetate

**PRODUCT INFORMATION:** Eezy K24 is a unique potassium-based fertilizer, formulated with an organic acid for optimal absorption into the cell membrane. Plants utilize both the potassium and acetate molecules to increase absorption and aid in development.

**DIRECTIONS FOR USE:** Use in accordance with recommendations of a qualified individual/institution.

**Soil Application:** Apply in-furrow, 2x2, or at sidedress or topdress. Use caution when applying directly on the seed on the seed in saline, alkali, or coarse textured soils.

**Foliar Application:** Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.
