

FUNGICIDES

GRANULAR FUNGICIDES

Signify DG

- Broad spectrum fungicide for the systemic control of plant diseases, including brown patch, dollar spot, snow molds, pythium, and more
- Two-way active ingredient combination of azoxystrobin and propiconazole
- Features Dispersing Granule (DG) Technology and smaller particle sizing for increased efficacy
- Allows golf course superintendents to utilize a lighter application approach; avoids turf stress from sprayer unit
- Avoids the need for LCO's to create a special tank mix; any applicator can apply as they would granular fertilizer
