LIQUID CALCIUM PRODUCTS

Product Code: 10008651 (Tote) / 10008652 (Jug) / 10008650 (Bulk)

GUARANTEED ANALYSIS

Calcium (Ca).....	6.0%
Magnesium (Mg).....	1.0%
Boron (B).....	0.5%

Derived from: calcium carbonate, magnesium oxide, boric acid, and carboxylic acids

WARNING: This fertilizer contains boron. Its use on any crops or under conditions other than those recommended may result in serious injury to the crops.

PRODUCT INFORMATION: Eezy Cal-Mg-B is a true solution containing nitrogen, calcium, magnesium, and boron. Each element is important for high quality and extended shelf life in fruits and vegetables and to produce maximum yields and quality in virtually all crops. Plants use calcium directly in their cell structure and as a buffer for other elements that are absorbed by the plant. Calcium in an available form aids in freeing up other calcium and nutrients in the soil.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. Eezy Cal-Mg-B is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

Soil Application: Apply 2x2 or at sidedress or topdress. Do not apply directly on the seed in saline, alkali, or coarse textured soils.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

Aerial Application: 3-5 gallons of water per acre is typically adequate for applying the recommended rate of Eezy Cal-Mg-B. Burning of foliage may occur if less water is used. Do not exceed 1 quart per gallon of water.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
